iMindQ® v9.0 new feature

Release date 10.05.2019

New Features	Description
New GUI	iMindQ® 9.0 introduces a new GUI. The redesign of the GUI aims to streamline the mind mapping experience of the users.

iMindQ® v8.2 new features

Release date 27.03.2018

New Features	Description
Apply Default Font Style to maps and notes.	With the Default Style section, users can customize the default working space by selecting one of the available styles. In the Graphical User Interface Tab in the Options Dialog, a Default Font Selection is added from which the users can set the Font and Font Size and apply it to Maps; Notes; Maps and Notes simultaneously.
Improvements	Description
Task Display Options improvements.	The dependency Relationship has been added as an option to be selected when displaying the task information.
Add Outline Number Column to the Gantt Chart View.	When using the Project Branch function, a work break down structure is displayed through a number outline. This provides an outline of all tasks and its subtask through a numbering format.
Enriched Map Templates	Users can start their mind mapping experience with all new and redesigned map templates.

iMindQ® v8.0 new features

Release date 04.04.2016

New Features	Description
Import from MS® PowerPoint (Windows version)	Import your PowerPoint presentations into iMindQ® and transform your PowerPoint presentation slides into logically dispersed subtopics of a mind map . There are several options to import the content of MS® PowerPoint presentations, which enables users to select the level of detail to be imported and generated as a mind map.
iCalendar and Reminder app synchronization (Mac version)	Plan and set reminders for daily activities and tasks with the synchronization options across your Mac and iOS devices . You can organize your daily activities and stay on track with planned actions by synching iCalendar and Reminder tasks, to-do lists, planned meetings and events.
Element Grouping	Visualize groups of elements with similar or distinctive attributes by inserting multiple boundaries per topic and visually present intersections or common elements , or separate a subset of elements that is part of a bigger set of objects.
Export to Open Document Text (ODT) file	Organize the outline structure and content of your new document, by exporting the contents of mind maps in .odt file format , a format that can be opened by most text editors on the market.
On-screen Tutorials	Users that are new to iMindQ® can benefit from the new on-screen tutorials and promptly learn how to create and edit mind maps through a step by step guide .
Improvements	Description

Collaboration with interactive HTML mind maps	Share and work on your ideas with your team, by exporting your mind maps in interactive HTML format . Once you share your map with your teammates, they can open it on any device and start adding their ideas to it. The map can be navigated, expanded or collapsed to the desired level of details, obsolete elements can be removed and new fresh ideas or feedback can be noted in the shared document . The changes to the map can be saved as a new HTML map and sent as feedback to the creator of the map.
Task info filtering	You can filter topics by different topic elements (notes, attachments, and hyperlinks), specific task information, images or icons used in the mind map, as well as search for topics with custom topic style applied in the map.

	iMindQ® has several predefined task info filters that will save you time searching for the tasks with specific task information.
Emphasize major idea characteristics	Highlight or describe different characteristics of specific ideas, concepts or objects , by defining major characteristics, and assigning appropriate values to each. You can even create your own custom properties and define name, type of data and add values.
Brainstorming template	iMindQ®'s library is enriched with a new brainstorming template , that users can utilize when generating new ideas or solving problems. It is unlimited in terms of adding new ideas and iMindQ® users can even group and associate correlating ones .
Task information options	New look of the task information preview and available managing option of task information visibility , by choice of the user.

iMindQ® v7.0 new features

Release date 20.07.2015

New Features	Description
Research Panel	With the new Research Panel users can insert important information, definitions, quotes, tweets, links and images within the map space by simple drag & drop from the results shown in the research panel. The Search results are generated from the following services of choice: Google Search, Google Images, OpenClipart and Twitter.
Import and export to OPML	Now iMindQ® users can import and export content from their mind maps to OPML (Outline Processor Markup Language) file format . This file format enables users to import outline content to their mind maps from other mind mapping or productivity applications that support it.

Multiple mind maps	Users can now create multiple mind maps in a single workspace , based on multi-directional floating topics. This feature can benefit the team brainstorming sessions where all ideas can be easily compared, analyzed and chosen to be focused on.
Improvements	Description
Export to interactive HTML mind map	Users can export their mind maps in interactive HTML format that can be uploaded on any website, blog or document management system . The interactive HTML mind map can be shared on social media or via e-mail and can be opened, navigated through, zoomed in/out and presented as animated story in any browser.

Notes improvements	The improvement in the notes feature includes the possibilities to insert images, tables and hyperlinks within the mind map notes . Users can insert and resize images, insert and format tables and add links to external webpages, topic, mail and file or folder in the mind map notes.
Presentation mode improvement	The presentation mode now lets users to preview the notes they add to each topic or subtopic within the presentation of the mind map .
New mind map part added to library	The library has been enriched with new mind map parts that can aid users for a more prompt creation of mind maps for business, personal or general use. The new map parts that are added also inherit the mind map style and design that the user sets.
Spreadsheet improvements	This feature enables users to use basic calculation operations of the data entered in tables within a mind map topic or subtopic.
Outline view improvements	Additional improvements within the Outline view of a mind map include repositioning and re-parenting of the topics within a mind map outline .

iMindQ® v6.2 new features

Release date 19.03.2015

New Features	Description
SharePoint Online integration	Users can now save mind maps in the cloud with SharePoint Online . This feature also enables you to manage more than one SharePoint Online Account in the application and work or use with the one you need interchangeably.
Improvements	Description

Improvements in the Project Management module	With the latest improvements in the project planning options of iMindQ®, users can now manage the visibility of different Task information within the Map space and also visually differentiate task bars in the Gantt chart with specific colors, collating to the mind map topic.
Enriched mind map part library	New mind map parts are added to the library, for assisting in faster mind map creation, correlating to the user needs for business, personal or general themed map parts.

Improvements in the Presentation mode	The improvement in the presentation mode enables users that present their ideas or plans with mind maps to be able to also present information from external links or attachments without the need to exit the application.
--	--

iMindQ® v6.1 new features

Release date 24.12.2014

New Features	Description
Split text in topic as subtopics	With this new feature users can now split a topic into multiple topics or multiple subtopics by using spaces as a delimiter. Also you can split the topic at a particular location by using the text to the right of the cursor as text for the new topic(s).
Improvements	Description
Improvements in the Presentation mode	In the new version of iMindQ® you can enrich your map presentations with three new template scenes : expand branch sequentially, highlight presented sequence, and expand branches parallel. Also, you can easily navigate through the scenes of your presentation, by using the arrow keys of your keyboard.
Improvements in the Project Management module	The improvement in the Project management module is the possibility to display the dependency type in your Gantt Chart table.
Improved export in MS® Word	You can export the Spreadsheet in a certain topic to a Microsoft® Word document.

iMindQ® v6.0 new features

Release date 09.10.2014

New Features	Description
Presentation Mode	The innovative presentation mode lets you create a one-click presentation of your mind map , by incorporating a clockwise flow of the topics with interesting animation effects. With this smart presentation mode you can also create your custom presentations of your concept maps, flowcharts and other types of diagrams , by using various animations and choosing the scenes to set the presentation's flow.

New scheduling mode	You can now manage and set working hours according to your project's needs, by using the 3 new calendar options : Standard, Night shift, 24 hours.
Improvements	Description
Redesigned File menu	The new iMindQ® includes additional improvements related to the user experience by implementing a new elegant look of the file menu .
Enriched map library	Other improvements connected to the mind maps' look and feel include: <ul style="list-style-type: none"> • Enriched libraries with new 3D icon sets; • New Map parts included; • New Map templates.

iMindQ® v5.0 new features

Release date 23.02.2014

New Features	Description
White Board mode	Using the white board mode now you can create much more than mind maps. This feature enables you to post independent topics, leave them as useful post-its or connect them in a logical and non-linear manner, resulting in the creation of maps according to your needs, such as concept maps, flowcharts and diagrams . iMindQ® offers a one stop solution where you can map out your ideas, business processes, tasks and organize activities, supported by several formats.
Organic mind map	One of the new mind map styles is the possibility to create an organic mind map , with inspiring color schemes and templates to boost your creativity and motivate your expression of innovative ideas.

Freestyle and auto ordering	With the freestyle mode you can modify the ordering of elements and topics. Additionally you can choose automatic ordering and spacing between elements, and use the magnetic auto alignment which offer an equal dispersion of elements when you reposition either one of them.
New formatting options	In addition to the new mapping options and modes, we have enhanced the formatting options and enriched our library with useful styles and formats, including: <ul data-bbox="738 689 1326 902" style="list-style-type: none">• Putting labels to relationships• Changing background image size and adding image shadow• Drawing boundary on multiple floating topics

	<ul style="list-style-type: none"> • Drag and drop of images, icons, shapes to topic or in empty map space. • Gradient Branch Style (coloring the topics in the branch with one color gradually) • Spectral Ties style (colored ties – each tie with new color)
Improvements	Description
Additional formatting improvements	<p>The new iMindQ® offers additional improvements connected to the mind maps look and feel which include:</p> <ul style="list-style-type: none"> • Enriched libraries • New Map parts included • New Map templates • Background Image Improvements • New Dynamic Formatting ribbons for Topic, Relationship and Boundary
MS® Outlook improvements	<p>The new MS® Outlook improvements include: Import Tasks Improvements, Export Task Improvements, Synchronization of Tasks and Appointments.</p>

DropMind® v4.2 new features

Release date 27.05.2013

New Features	Description
GUI improvement - Windows 8 recommendations	<p>Following the trends imposed by Windows 8 appearance, our team of developers brings to our users great graphic improvements consistent with the latest Windows 8 recommendations. With this graphic user interface improvement, our mind mapping tool looks more professional and user-friendly and can significantly speed up the user's workflow.</p>

**Add Constraints to your
Tasks or import them from
Microsoft Project®**

Impose restrictions on the way that the task's start and finish dates are calculated by set constrains on your project tasks or import them from Microsoft® Project. By using this features you can set your task to start as early/ as late as possible or to start/finish on a specific date by using one of the following constraints: Finish No Earlier Than, FinishNo LaterThan, MustFinishOn, Must Start On, Start No Earlier Than, Start No Later Than. When you set constrains they will be calculated based on the durations and task dependences you enter.

DropMind® v4.1 new features

Release date 22.11.2012

New Features	Description
Free Desktop Version (Windows and Mac)	The free mind mapping version provides you with intuitive and organic mind mapping features including advanced formatting, all map views available including WBS charts and spreadsheets. By downloading the desktop version, all features from our paid mind mapping solution will be available in period of 15 days.
Map Styles	Map style feature allows you to change the outlook of your map by selecting one from the available styles. After applying the appropriate style, you can make customizations of some topic, by changing the shape, color, font, etc.
Style Editor	Apply different visual styles from the DropMind® library into the map. In addition, with the available features from the Style's drop-down list you can create your own topic's style library and manage it or Insert one of the available patterns from the DropMind's library into the map and change map's background color.

DropMind® v4.0 new features

Release date 20.09.2012

New Features	Description
SharePoint integration	This functionality provides you the possibility to increase company collaboration through uploading, viewing and editing mind maps hosted on Microsoft® SharePoint Server directly from the application.
Facebook integration	With the new version you can easily share your mind maps

	images on Facebook, very easy, in no more than 2 steps.
Tree layout	The tree layout will let you build your map as a top-down tree. It gives you a great option for building a big map with many branches and topics as it is the most space-efficient layout. It's ideally suited for building and presenting organization charts, the overall structure of your project, and hierarchy levels.
Add icon and markers	You are now able to insert your own icons and markers to topics from your computer.
Edit line width	You are now able to change the tie and border width of the topics separately.

Shrink sub-tree distance	With the shrinking feature, you can decrease the distance between your neighboring topic branches and save lot of space on your mind map.
---------------------------------	---

DropMind® v3.5 new features

Release date 12.08.2012

New Features	Description
WBS chart	Work Breakdown Structure (WBS) is the essential feature of every project that helps you present data, products or ideas in organized structure decomposing your project into smaller components.
Session manager	This feature helps you organize your work with multiple maps at the same time. Provides possibility to open, edit or clone maps and gives users complete control of their mapping workspace.
Exporting Gantt chart as image	Now you can export your project schedule as image, print it or transfer your Gantt chart as image in other project documents.

DropMind® v3.3 new features

Release date 19.02.2012

New Features	Description
Web Browser	With the new built-in browser, information is available and simply organized in to logic sequence. Evaluate or compare information, drag and drop hyperlinks, images or content and save your valuable results in a mind map.

Automatically build map	Build your map as you search for content on the Web. With every click to a new site, this feature automatically creates subtopics and allows you to copy text, drag and drop images and links to your map.
Import .xml file format	Another import option is available in DropMind v3.3. Visually represent your project data by importing .xml file, created according Microsoft Project .xml schema, and give better preview of tasks and project organization.

DropMind® v3.0 new features

Release date 13.06.2011

New Features	Description
Gantt Chart	With Gantt Chart view, see the whole picture in one chart for faster and better creation of projects. Gantt Chart view enables a more organized view of ideas, suggestions and project goals. It gives tabular and graphical presentation of the tasks in the project plan. Start planning your project by brainstorming on project details and see how independent elements come together. This feature is great for visual project management.
Improvements	Description
Task Info	This feature allows you to create tasks from the topics. Using the Task Info panel, you can define and edit the start and finish date of the task, update task's progress through % complete and prioritize the task using the Priority field. Using DropMind® to manage tasks helps you see the big picture of all your tasks.

DropMind® v2.5 new features

Release date 10.03.2011

New Features	Description
Exporting topics as an appointment	This feature allows you to create an appointment in Microsoft Outlook from the topic in the map. After the appointment is created, its parameters are attached to the map's topic. Synchronization is implemented i.e. if some parameter is changed in the appointment, it will be

	synchronized with the map's parameter.
Implement of Header and Footer tab in Page Setup window	This feature allows you to insert header and footer for the printout of the map. Inside the header and footer, you can insert current date and time, company's logo, map's name and etc., in order to implement the company's policies for the printout documents.
Work with Relative Hyperlinks	This feature allows you to work with the relative hyperlink, i.e. hyperlink that contains an address that is relative to the address of the destination file. The address of the destination file is also known as the hyperlink base.

Improvements	Description
GUI Improvement	This improvement is related with the Application menu, where all features are grouped according their functionality and the ribbons where the groups are relocated according their function. In both cases Microsoft policies for the Application menu and Ribbon are consulted.
Task Management	This improvement is related with the Task Management in DropMind , i.e. convert the map topics into tasks, implement and work with the project management rules with the newly created tasks in the map.
Docking windows	This improvement is related with the tabs and windows located on the right side of the DropMind working windows and it allows to dock/undock the tabs and move them around the working space.
Support DDMX file format	This improvement is related with the work with the files in the .dmmx files format (which is native file format for iDropMind i.e. user can edit them in the desktop version).

DropMind® v2.4 new features

Release date 29.11.2010

New Features	Description
MS Office 2003/2010 support	Now it will be easier to keep projects on track <i>with</i> MS® Office and MS® Project. Beside the actual support for MS® Office 2007 and MS® Project 2007, DropMind now supports MS® Office and MS® Project 2003 and 2010.
Map from Topic	Experience the possibility of easily creating a mind map from a topic. Select one topic and with only one click create a new map from that topic and all his branches.

Insert parent topic	Expand you map easily. With the new release you can select multiple topics and insert a new one which will be parent to all of the selected topics.
Custom boundary	Add a single boundary to multiple topics from the same level with only one click. Choose the desired formatting options for the boundary even before inserting it.
Filter Options	See the information you need right away. Filtering in the map is extended with new filter options: by type of icon, priority, percentage complete, start date, etc.
Insert Hyperlink	Now you can copy hyperlink, select topic and paste the hyperlink location. You can also insert hyperlink with drag

	and drop from topic to topic and add hyperlinks to Https and Ftp locations.
Drag and Drop Options	Work on your map as smooth as possible. Add attachment, icons, reorganize images into folders with drag and drop.
Upload Multiple Files	Now, you can upload more than one file at once. Select all the files you want to be added to the selected topics and you can attach them with only one action.
Improved Copy/Paste Options	Now you can copy images paste it to topics without the need to uploading them. The images will be added to "My imported Maps" Library for further usage. Moreover, you can copy, text from any source and paste it with applied formatting options to the selected topic, no matter if the text is neither in bullets, numbering, or simple paragraph.
Interoperability improvements	Get a whole picture of your work by exporting all visual parts of your map directly to Word document.

DropMind® v2.3 new features

Release date 27.08.2010

New Features	Description
Touch devices gesture actions	Create and navigate your maps easier with the simple multi-touch gestures. Beside standard touch actions you can use advanced actions for touch devices: Select topic, De-select, Move background, Switch topic, Single/double mouse click, Edit topic text, Create floating topic, Select topic to drag, Multiple selection, Scroll, Zoom In/Zoom Out, Context menu.
Import/Export MS® Excel extended functionality	Now you can use the new option form import selected cells content from MS® Excel. The selected cells will be imported as DropMind® topics and subtopics. Moreover, you can export map structure and topic values from

	selected topic to MS® Excel.
Extended Notes editor	Extended Notes editor allows you to format the notes text, as well as to add hyperlinks, go to the next topic and edit topic name from Note panel. The following elements are available for editing notes: Font format: Bold, Italic, Underline, Crossover; Align: Center, Left, Right; Bullets: three Bullet types; Indent/Outdent text; Undo/Redo within notes editor; Add Hyperlink; Go to Next/Previous topic note; Change topic name from Notes.
Custom boundary	Extended functionality of boundary topic element allows you to group several related topics with creating a boundary on custom multiply selection of sibling topics and their subtrees.

Gradient on topics	Now the mind map topics are presented with modern shaded design. The new graphical control on topic properties is topics gradients.
Insert topic bellow selected topic	The order of inserting sibling topics is improved by allowing you to insert sibling topics next to selected topic.
Advanced Filter	Extended Filter functionality allows you to filter the map content using the following criteria: Task Info, Topic Style, Icons and Images, Other filtering options.
Multiple hyperlinks per topic	Now you are able to add unlimited number of Hyperlinks per topic, from one or more types. Hyperlink will be presented as graphical element of the topic, with appropriate icon for each hyperlink`s type.
Extended set of icon and image libraries	Icon and image libraries are enlarged to make your visual even more appealing. Now you can choose from several groups of images: Business, Academic, Technology, Science.
Improvements	Description
Spreadsheet resize	The Spreadsheet are further improved with adding the resize control.
Synchronized map relocation	The Synchronization functionality is improved by allowing you to synchronize your maps from any folder, move map to synch folder and make shortcut to the old location.
Custom Properties and Spreadsheet improvement	Custom Properties and Spreadsheets are improved with extended functionalities: controls just in edit mode, print preview, header names, add/remove row/Colum.

DropMind® v2.2 new features

Release date 14.06.2010

New Features	Description
MS® Excel Import/Export	Share your plans, outcomes and ideas with your team. Now you can export your Mind Map as a Microsoft® Excel spreadsheet and import a spreadsheet as a Mind Map.
Spreadsheet	Make you work more understandable for you and others. Insert spreadsheet with desired size and layout directly in the selected topic.
Custom Property	With Custom Property you can add different attributes to topic element, with custom name, and choose between several types: Boolean, Number, Text, Date, Time, Date and Time. You can use them as well as a platform to precisely export and import data with applications like MS® Excel.

Improvements	Description
Improved Export to MS® PowerPoint	Besides exporting as text, now you can export generated slides in PPT presentation slides as pictures.
Task Management improvement	Improved flow and functionality of the task management feature.
Import MS® Word Improvement	Now it is possible to import MS® Word objects into mind map.
Import MM6, MM7 and MM8	Extended importing features to versions MM6, MM7 and MM8. All import/export functionalities are updated with all new features.

DropMind® v2.0 new features

New Features	Description
Seamless integration	Share your plans, outcomes and ideas with your team. Now you can export your Mind Map as a Microsoft® Excel spreadsheet and import a spreadsheet as a Mind Map.
Task Management	Make you work more understandable for you and others. Insert spreadsheet with desired size and layout directly in the selected topic.
MS® Project integration	With Custom Property you can add different attributes to topic element, with custom name, and choose between several types: Boolean, Number, Text, Date, Time, Date and Time. You can use them as well as a platform to precisely export and Import data with applications like MS® Excel.
MS® Outlook integration	With MS® Outlook integration feature you are able to exchange and synchronize task information between MS® Outlook and DropMind® without losing any important data or notification.

MS® Word export	Now you can export your created mind maps in MS® Word with advanced layouts. The exported map in a MS® Word document gives complete overview of the inserted topics and all other visual elements created in DropMind®.
MS® PowerPoint export	Now you can create and export MS® PowerPoint presentations with advanced features and predefined slide layouts.
Four directions mind map layout	Gain unique experience with one-of-a-kind map layouts. Experiment with your map space and have fun while topics are automatically arranged left, right, above or below the central topic.

New subtree layouts	Beside existing "Map layout", now you can show complete mind map or map subtree in new layouts: "Right layout", "Left layout", "Organization Up layout", "Organization Down layout".
Drawing of ties	Beside existing "Curve ties", now you can use new types of ties: Elbow tie, Angle tie, Straight tie.
Auto Save and Auto Recover	Your current work on a mind map is Auto saved on defined period, which latter can be recovered automatically.
Full screen	Now you can view your mind map in an extended working area to maximum on your screen. You can execute all mind mapping functions in this view and have direct access through the tabbed menu.
Export to Mindjet MM 6	Now you can view your mind map in an extended working area to maximum on your screen. You can execute all mind mapping functions in this view and have direct access through the tabbed menu.
Link to topic in a same map	Add a hyperlink to a topic that will associate it with another topic in the same map. When you click on the hyperlink icon in topic, the "linked" topic becomes selected and viewed.
Navigator	Navigator shows the whole available space where you can move the map. The map is shown proportionally to the whole available space. You can move the around your mind map with drag and drop in the navigator.
Switch Subtopics	You can change the order of the topics and subtopics. With drag and drop, subtopics can be re-ordered on desired location between their sibling topics. By clicking on the drag and drop space, every subtopic in the map can be moved from current location to another.
Map Security	Your mind maps are further protected from unauthorized use with encryption of map. For this purpose file is protected with password.

AutoScroll	You can drag and pull topic out of the actual view. DropMind® will automatically scroll the actual view to desired location.
Topic size	Topic size with large amount of text can be changes as desired.
Font size	This text format changes text size to desired point size.
Clear formatting	This action clears all formats to selected text or topic.
Improvements	Description
Languages	Besides the existing languages: English, German, French, Japanese and Spanish, now Portuguese users can work and brainstorm in their own language with all of the new and powerful features.

Scroll up and down by using keyboard	You can scroll horizontally and vertically on the mind map view using Ctrl + arrows.
Start Alerts service on start	Get your alerts on the start of your PC without the need to start the application. Stay up-to-date and organized.
Presentation mode improvement	Work with a higher slide and schedule the generation of slides upon your needs. Arrange the presentation as you desire.
GUI design	Work with the new, attractive and smooth menu design. Have a variety of new and improved icons to enrich your mind map visually.

DropMind® v1.1 new features

New Features	Description
Task properties	Enter task information to the appropriate topic and determine task priorities. Moreover, you can mark the Start Date and the End Date of the selected task, add Duration, % Complete, as well as assign Resources responsible for working on and finishing this task.
Filtering	Filtering is a way to view only a subset of the topics on a map. This eliminates the need to delete topics that are not currently of interest, but remain valid map content. To filter some topics select a set of topics and then press on show or hide button, or filter topics based on their properties: icon markers, notes, hyperlinks, attachments, key topics or alerts.
Map parts	Save part of a map you've created as a Map Part for easy re-use. The map part is saved in 'Library' and you can easily apply this actual part to other place in the map, or totally different map.
Alerts	Use alerts to set a reminder to open and work with a specific map at an assigned date and time.

	You can set an alert for any map topic.
Export to XML	Open format for importing in other mind mapper. Write all included elements in .dmm mind map format.
Export to Freemind	Exports current DropMind map in the Freemind format.
Numbering	Numbers will be added before the topic text. Topics will be numbered from the selected topic. You can choose the numbering scheme from a predefined set of options and depth to which the numbering will be applied.
Topic styles	Create a new style from the selected topic and add them in the topic styles 'library'. Afterwards you will be able to choose from different topic style and apply them on topics.

	These include the topic font, shape and color, alignment, size and margins, and subtopics layout.
Summary	Summary is a type of Boundary that allows you to put callout on the group of topics/subtopics.
Language support	DropMind® speaks your language now! All Japanese, French or Spanish users can work and brainstorm in their own language with all of the new and powerful features.
API	DropMind® API is a programming interface which should provide the following functionalities to other developers: Developing of add-in libraries; Creation of DropMind map documents without starting of DropMind® application. This functionality will allow creation of map documents using object model. With this third party application will be able to create document without knowing the exact format of the file. The following DropMind® classes/resources should be accessible via API: Icon, Image, Shape, Style libraries and their items; Creation, opening, saving of the document.
Positioning of the topics	With the newest layout implemented, you can avoid the space explosion problem. The needless gaps between topics when you add subtopics are gone now. Keep your topics as compact as possible. As you add subtopics, the space between the main topics is kept to minimum, so you can utilize the whole map space and avoid the lame gaps.
Speed improving	Speed improving when creating and editing map. Optimization of application for large maps and large number of Main topics.
Multiplatform support	Multiplatform support: Windows XP, Windows Vista, Windows 7, Mac OS, Linux Ubuntu.
Improvements	Description
Integration improve	Better integration and synchronization with DropMind® web application.
Platform dependent features	Adjusting platform dependent features on Mac OSX and

	Linux Ubuntu.
Import/export	Embedding of all new functionalities in import and export features.
Insert Floating	Improvement in usability during editing and inserting Floating topics.
Windows 7	Test and compliance with Windows 7.
